

Safety Tip #6

Fire Escape Planning at Home or when Traveling

We Rise and Shine

Plan Ahead! If a fire breaks out in your home, you may have only a few minutes to get out safely once the smoke alarm sounds. Everyone needs to know what to do and where to go if there is a fire.

SAFETY TIPS

- » MAKE a home escape plan. Draw a map of your home showing all doors and windows. Discuss the plan with everyone in your home.
- » KNOW at least two ways out of every room, if possible. Make sure all doors and windows leading outside open easily.
- » HAVE an outside meeting place (like a tree, light pole or mailbox) a safe distance from the home where everyone should meet.
- » PRACTICE your home fire drill at night and during the day with everyone in your home, twice a year.
- » PRACTICE using different ways out.
- » TEACH children how to escape on their own in case you can't help them.
- » CLOSE doors behind you as you leave.

IF THE ALARM SOUNDS...

- » If the smoke alarm sounds, **GET OUT AND STAY OUT.** Never go back inside for people or pets.
- » If you have to escape through smoke, **GET LOW AND GO** under the smoke to your way out.
- » CALL the fire department from outside your home.

FACTS

- ! A closed door may slow the spread of smoke, heat, and fire. Install smoke alarms inside every sleeping room and outside each separate sleeping area. Install alarms on every level of the home. Smoke alarms should be interconnected. When one smoke alarm sounds, they all sound.
- ! According to an NFPA survey, only **one of every three** American households have actually developed and practiced a home fire escape plan.
- ! While **71%** of Americans have an escape plan in case of a fire, only **47%** of those have practiced it.
- ! **One-third** of American households who made an estimate thought they would have at least 6 minutes before a fire in their home would become life-threatening. The time available is often less. And only **8%** said their first thought on hearing a smoke alarm would be to get out!

Comments and

Lessons Learned

- When staying at a resort, condo, B&B, or VBRO, check for the following:
- Locations of, exits and different ways to escape, sprinkler system, fire extinguishers and working smoke and CO detectors indicated with a green light
- If there is a fire, pull the fire alarm on your way out, use stairs and close door behind you.
- If a fire alarm sounds, feel the door before opening, if cool exit, if hot, find another way out.
- If trapped in a room, seal the door with wet towels to keep the smoke out, call the Fire Dept. and advise where you are.
- If possible, open a window slightly and wave a bright colored cloth to signal your location. Be prepared to close the window if it make the smoke condition worse.
